Stick to what you know and get left behind!

So many companies promise so much to you as a new emerging band and artiste, it's really difficult to tell who is full of bull and who is the real deal.

BCL studios are the production brains behind the hit radio programme Magazine™ A programme aimed solely at new unsigned and independent music from around the world. A programme committed to airing your new music. There are no middle men, no white collar corporates and no one dictating what can and cannot be played. It is simply about delivering new music to new listeners and to create more awareness for emerging music from around the world.

So many bands and artistes seem to be stuck in that same old rut by sticking to what they know. Times are changing at a rapid pace with new technology and with the internet. My advice, 'don't get left behind'. Creating awareness does not have to be such a daunting task.

BCL studios, Magazine and our teams have all the tools to help you create everything from recording and production, right through to creating visually appealing press releases, posters, CD and DVD artwork. All you need to do is unleash your creative ideas. These do not need to cost an arm and a leg as so many companies would have you believe. Get out of the hum drum and get cracking to get your band /artiste on the road to success. All our facilities and the work we do for clients has one goal in mind, to pump the profits back into the radio programme and discover new ways to promote your new music. help us to help you, it is really that simple.

We are making waves with major as well as indie record labels, promoters, the press and media along with great industry contacts. Let us work for your success, after all, your success will become our success story.
