

Want to record with your backing tracks?

Whether you are on the road with a career in music or simply a first timer to recording your material. A lot of artistes find it easy to purchase a great quality backing track to use for their performances. Here at BCL studios, we simply take your backing track and load to our Pro Tools system then start working with you to record your vocals before mixing with the best reverbs and outboard equipment to give that truly professional finished track.

We will then master for CD and also give you 20 completed CD's that you can use to promote yourself or sell at your gigs.

Record upto
4 tracks for only
£200

and get 20 CD's
with full artwork
of your completed
backing track
recording project.

Call or email us and have a chat about
recording with backing tracks.
