

# BCL STUDIOS

## audio transfer services

The bygone era of vinyl, but still a very much preferred medium for DJs and the audiophile. And of course with those lost or forgotten master tapes, the only way to recreate a new master is by transferring direct from vinyl itself.

BCL studios utilise a hand built solid turntable with an Ariston arm and a Shure SC353 cartridge, we found this cartridge to be very flat in response with little or no coloration to that of the original sound. This then feeds into our analogue to digital conversion system before being recorded to our transfer server. All in-coming vinyl is always checked and cleaned prior to any transfer taking place.

Once we have the completed master files on CD, we can also supply these files in all other audio formats, please ask about these services.

transfer  
from vinyl  
to master CD  
£35  
per hour

*|| transfer includes ||*

*top and tailing  
of tracks*

*audio enhancement*

*compiled to  
red-book standard  
master ready CD*

Call or email us and have a chat about transferring your audio from Vinyl.
