

BCL STUDIOS

audio transfer services

Re-compiling from your master CD-R is not anything new to us, we do this day in and day out. Your master CD-R is checked digitally to hex level using hardware only found in a CD manufacturing plant. We want to be certain your master CD-R has no errors whatsoever. Error correction can be made depending on the severity. We will never accept a CD-R that is damaged beyond repair. We will notify you of ALL errors prior to transferring.

BCL studios use only Pioneer and HP CD recorders and players. We found these to be the most compatible when it comes to firmware levels, stability and reliability.

Once we have the completed master files on CD, we can also supply these files in all other audio formats, please ask about these services.

transfer
from vinyl
to master CD
£20
per hour

|| transfer includes ||

like for like transfer

*digital track markers
as per original CD-R*

*compiled to
red-book standard
master ready CD*

Call or email us and have a chat about transferring your audio from CD-R.
